

McCourt Student Showcase: Muhammad Saad (MS DSPP '26)

Device-based movement at county level to model disease spread

Differential Privacy to protect privacy

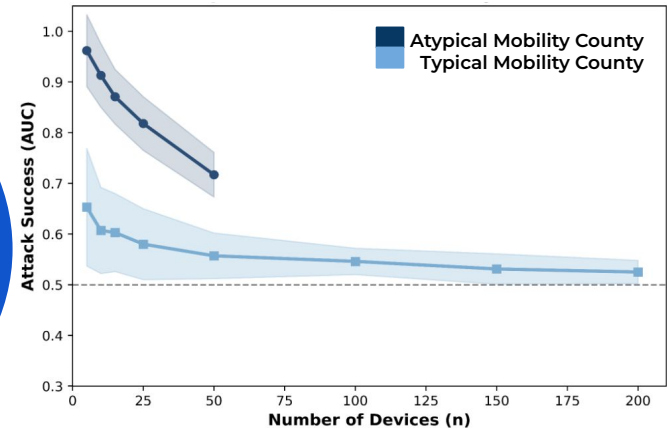

National Level Disease Spread at Different Privacy Levels

Privacy risks in
aggregated, anonymized
human mobility data for
public health policy

Privacy attack on aggregated, anonymized mobility data

CONCLUSION

Aggregated, anonymized data not
immune to privacy risks

Accept tradeoffs in data accuracy
and access to protect privacy
